JUSTIFICATION

1. As of 1 July 1951, doctors will become relatively unavailable. If CIA is to have the doctors it requires, provisions for their procurement should be made at this time.

25X9A2 2. Repeated efforts have been made to determine CIA medical personnel requirements. It is estimated that the Agency could use [REDACTED] doctors by 1 July 1952. See Attachment A.

3. By reason of space, project development, funds and training requirements, it is impractical to procure the maximum figure at this time. Therefore, it is most reasonable to establish a doctor pool so that fractional solution of the problem may be accomplished in terms of reality.

4. The Medical Office cannot state the exact methods by which it will accomplish this project. However, it is believed that with the cooperation of Personnel and the Office of Secretary of Defense, provisions can be made for the procurement of the desired number. Training arrangements can be made with medical centers on a reciprocal basis so that groups of doctors can be trained while still serving at a hospital. Any time not required in specialized medical training can well be utilized in CIA preparation for individual assignment and in support of the mission of the Medical Office.

25X9A2 5. It is estimated that over [REDACTED] medical technicians will be required by 1 July 1952, (See Attachment B.) To ensure rapid procurement, training, assignment and supervision, and to provide a constantly available reserve in case of disaster, it is considered reasonable to also establish a technician pool. This pool could be smaller than the doctor pool due to the comparative brevity and scope of training requirements.

6. In addition to pool personnel, the Medical Office will require several new T/O additions to accomplish the program and to provide the reserve anticipated as of 1 January 1952.

7. The total personnel required is outlined in Attachment C.

8. The funds required are outlined in Attachment D.
9. The space required is outlined in Attachment E.
10. The program has been coordinated with the operating offices concerned, Training and Personnel.

FUNDS REQUIRED

Doctor Pool

6 months at [REDACTED]

25X1A1a

Technician Pool

3 months at [REDACTED]

25X1A1a

Work [REDACTED]

The working fund of [REDACTED] is an initial allotment to allow for the functioning of the pool. The cost of training on an individual basis should be paid for by the project concerned when assignment is made to the project.

25X1A1a

The Medical Office would like to establish special categories of pay for trainees whenever possible. It is estimated that doctors deferred for CIA training might be entirely willing to work for less than \$7600 per year.

It is anticipated that only a small portion of the medical training areas will require remuneration so that funds as requested should prove sufficient.

It is believed that the working fund should be provided from unvouchered funds.

SPACE

Doctors

One or two additional rooms in Central Building would be helpful but the problem should be deferred until we get the doctors. The majority of the doctors will spend little time in the Medical Office.

Technicians

50% of each pool will be retained at the [REDACTED] School. TRD and the Medical Office can absorb the rest.
